

Abdullah Gül University (AGU) Library, through its “I Read with My AGU Library Project,” continues to carry out activities with determination in line with the Sustainable Development Goals (SDG-4 Quality Education) and SDG-10 Reduced Inequalities. Within this scope, the library organizes various workshops and activities for primary schools, middle schools, and high schools wishing to visit the library. In 2026, students participating in these activities visited the AGU Library accompanied by their teachers, toured the library, and read books specially prepared for them according to their age groups and levels. Afterwards, they attended informative presentations held in our university conference halls, where they learned about the functions of libraries and the contributions libraries can make to their educational lives. Following the presentations, they participated in creative drama and reading workshop activities prepared for them
