

Abdullah Gül University (AGU) Library continues its activities with determination towards the Sustainable Development Goals (SDGs) "4 Quality Education" and "SDG-10 Reducing Inequalities" through its "Reading with the AGU Library Project". Within this scope, it organizes various workshops and events for kindergarten, primary, middle, and high school students who wish to visit the library. In 2026, students and teachers participating in these events visited the AGU Library, toured the library, and read books prepared for them according to their age groups and levels. Afterwards, they participated in informative presentations about libraries and discussions in the university's conference halls, focusing on the healing power of libraries and the contributions that a reading culture can make to their lives. Following the discussions, they participated in creative drama and reading workshops prepared for them.
